BLOGGER REVIEWS

OSTACRUISER
World-famous ATV & UTV rider

It is super comfortable, really durable, and keeps me and my crew dry! It's the best choice on the market.

ADRENALINE JUNKIE PROD
Team of Youtube vloggers

We really love our FINNTRAIL gear. It does great in mud, dirt, rain, or even snow. It's hands down the best wet weather riding gear you can get, we recommend it to everyone!

ALISON TYSICK
Passionate off-road rider a.k.a. Canam Girl

All I can say is, once you go FINNTRAIL you don't go back.

KYLE MAINVILLE
Popular Youtube Creator

Once you give their gear a shot it will become your new standard for what you expect off road gear to be like.

DEALER REVIEWS

ATC CORAL
Chris Jung Owner/Operator

The main reason why we choose FINNTRAIL over its competitor Gator waders is the quality of the waders. Fit and finish these are hands down the best product on the market, hence why we wanted to offer it to our Off Road enthusiasts. One key detail we have found dealing with FINNTRAIL is their fast response when Warranty claims need to be done. The quick delivery service we receive is also a huge factor to keeping us and our customers happy.

ROYAL DISTRIBUTING
Brock Parker Community manager

The inspiration to bring on FINNTRAIL came from how well the brand performs and how it's unique compared to other brands selling similar gear. Through feedback from employees and ambassadors, it's regarded as the most reliable gear when facing the elements and it's what is needed to stay dry. We love FINNTRAIL communication and support in executing marketing projects. They've been excellent in supporting our marketing initiatives and including us in their marketing initiatives. We're excited to continue to grow our relationship with Finntrail!

LIFE OUTDOORS
Brittany Rock

The wide variety of sizes, colours, fits and models was the biggest thing, but the great availability, supportive customer service, amazing product quality and now the Canadian warehouse made it a no brainer!

What is appreciated the most is how quickly any and all questions, concerns, warranties etc are responded too and resolved. What we enjoy most is that FINNTRAIL listens to customers/dealers opinions and suggestions and is always working to improve on those things and get better and better!

SUITS

There are some rides on which you do not have to hit mud puddles and deep fords. Sometimes it's a pleasure to pack light for a ride. These FINNTRAIL suits are what you need. You'll get the same level of quality and protection against moisture and rain, while staying light and highly flexible.

SUITS

RIDER 3475 NEW

SUIT

The rain suit is made of a 2.5-layer ripstop material with DWR water-repellent coating and a Hard-Tex membrane. It is perfect for off-road activities such as motorcycle and ATV rides but can also be used for other outdoor activities. The jacket and pants of the suit should be worn over clothing or gear.

SIZE S - XXXL

COLOR Graphite, CamoShadowGreen, CamoShadowBlack

WATERPROOF 10 000 mm
BREATHABLE FABRIC 8000g/m²/24h

- Durable RIPSTOP 2.5-layer material with HARD-TEX membrane
- DWR water-repellent coating
- Ergonomic suit design
- Sealed seams
- Center dual-zipper closure with a windproof and waterproof placket
- Adjustable hood
- Cinchable elements for perfect fit
- Reflective elements

THOR 3420

SUIT

This suit is designed for trail riding without deep fords and mud pits. It consists of two parts: bibs and a jacket. The bibs feature a high back with an insulation layer and adjustable suspenders. The jacket is equipped with a strong front zipper, a storm flap with magnetic fastening, reliable outer and inner cuffs, and a detachable hood.

SIZE S - XXXL

WHAT ARE SIDE-BY-SIDE SUITS?

These unique suits are specially designed for SxS racing and recreational UTV driving . Whatever the terrain, weather-resistant pieces protect against wind, dust, debris, and other elements. Made of comfortable high-performance fabrics, these suits are reinforced by adding Ripstop weave in the most high-stress areas - elbows, knees, and crotch. Ergonomic construction reduces driver restrictions in a sitting position and provides all-day comfort. The design of each SxS suit is inspired by professional racing gear with distinctive shoulder details and reflective prints.

SIDE-BY-SIDE SUITS

GUARD 2507 NEW

SIDE-BY-SIDE SUIT

A new dust suit is built to protect you from dust and debris while riding your side-by-side or performing machine maintenance. Made of lightweight Ripstop Teflon-coated fabric, it ensures exceptional comfort and mobility. Designed to fit your body's movements perfectly, it features armpit vents for temperature control and easy pocket access.

SIZE S - XXL
COLOR Red, Graphite

STIG 3790 NEW

WHAT IS A WADING JACKET?

A wading jacket is specially designed for off-road riding through multiple terrains and weather conditions. It is made of waterproof and breathable membrane fabric with water-repellent coating for better protection. The wading jacket is usually shorter than a regular jacket, has no lining, and is equipped with off-road friendly features, such as water-resistant chest-level pockets, D-rings to attach a kill switch lanyard, helmet-compatible or detachable hood, strong mud-resistant zippers and magnetic fastening instead of Velcro.

WADERS

Waders are a type of waterproof overalls designed to cross water obstacles up to 1.5 m (5 ft) deep without getting wet. Finntail developed these waders to address ATV/UTV riders' unique demands and features. Our waders prioritize the rider's safety and comfort, allowing them to perform at the highest level without limitations.

The HARD-TEX membrane fabric ensures both breathability and waterproofness, keeping water away while allowing moisture to evaporate. Moreover, the waders feature a variety of special attributes that guarantee comfortable and seamless rides, including anatomical cut to ensure freedom of movement, extra reinforcement in high-stressed areas and other special features for all ATV/UTV riders.

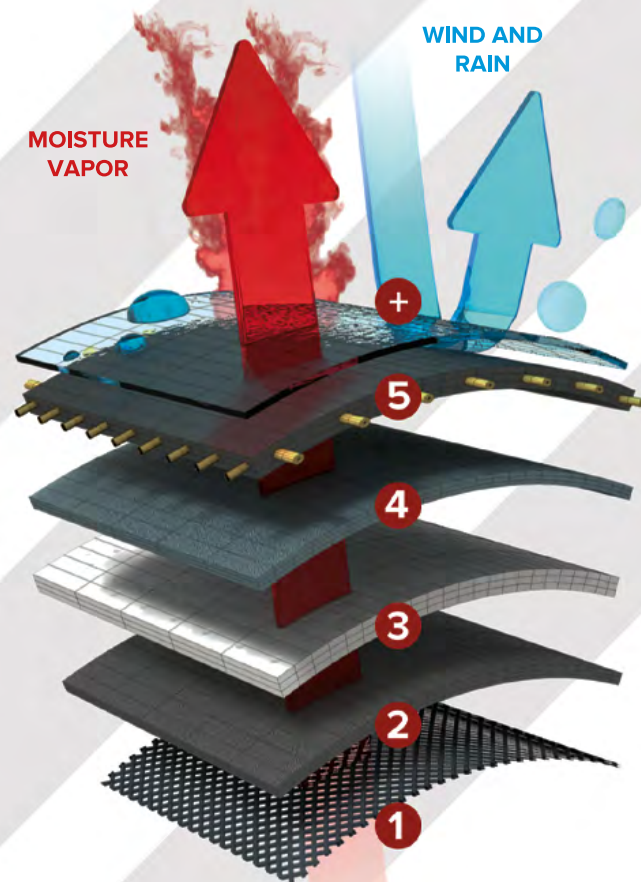

FIVE-LAYER FABRIC OF FINNTRAIL WADERS

Taking on the roughest trails is a blast, but the clean-up that follows? Not so much. Ordinary waterproof clothing doesn't always get the job done.

Lucky for you, FINNTRAIL gear is far from ordinary. Its durable, breathable material provides protection from mud and sharp branches, yet ensures flexibility and comfort.

THERMAL CLOTHING FOR ALL SEASONS

A layering system is a combination of layers from thermal underwear to shells that work together to keep you comfortable, warm and dry in the outdoors, allowing you to adapt to the environments and weather conditions. Here is the classic layering system.

The base layer is thermal underwear which sits next to your skin and wicks your sweat away. The mid layer is intended to provide insulation while still allowing moisture to escape. The outer layer works as a shield from the elements, water and wind. When developing all three layers, we make sure that each item performs at its best and provides the proper flexibility for your best ride.

FINNTRAIL RIDING SYSTEM

1 BASE LAYER

- Moisture removal and temperature regulation
- Thermal underwear

2 MIDDLE LAYER

- Highly durable and warm without weight
- Fast drying

3 OUTER LAYER

- Protection against water, mud and wind
- Reinforced breathable membrane fabric
- Technological insulation with high capacity

BASE LAYER

ALL SEASON 6205

THERMAL UNDERWEAR

Hypoallergenic ALL SEASON underwear is perfect as a moisture-wicking base layer in hot weather or next-to-skin first thermal layer in the cold. Designed with minimal seams to ensure close fit and let the material perform its best at wicking away heat-robbing moisture so you stay dry all day long.

 +15°C to -15°C

- Temperature range: -15°C to +15°C
- Odor control fabric
- Hypoallergenic material
- May be worn all year round
- Designed for extreme tasks
- No crotch and side seams

SIZE S-M, L-XL, XXL-XXXL

THERMO-S 6304

THERMAL UNDERWEAR

THERMO-S thermal underwear is a base layer for cool-to-cold weather. Made of dense stretchy fabric with a soft brushed interior to trap heat and wick excess moisture away. Anatomical fit and flat seams prevent chafing and ensure greater comfort.

 +10°C to -25°C

- Temperature range: -25°C to +10°C
- Anatomical fit
- Flat seams
- Elastic fabric with microfleece interior

SIZE XS-XXXL

COLOR Black, Grey

SUBZERO 6404

THERMAL UNDERWEAR

SUBZERO thermal underwear is perfect as a warm base layer or additional thermal layer in the cold weather. Made of dense material with WAFFLE-KNIT technology, it perfectly accumulates body heat and wicks away moisture. High zip collar and anatomical cut deliver a snug fit and good protection against cold air flow. Flat seams prevent chafing.

 0°C to -30°C

- Temperature range: -30°C to 0°C
- Hypoallergenic material
- WAFFLE-KNIT® fleece
- Flat seams
- High zipper collar

SIZE XS-XXXL

COLOR Black, DarkGrey

SUBZERO-S 6405

WOMEN'S THERMAL UNDERWEAR

The warmest base layer in our women's thermal underwear range. Made of dense material with WAFFLE-KNIT technology, it perfectly accumulates body heat and wicks away moisture. High zip collar and anatomical cut deliver a snug fit and good protection against cold air flow. Flat seams prevent chafing.

 0°C to -30°C

- Temperature range: -30°C to 0°C (-22°F to +32°F)
- Hypoallergenic material
- WAFFLE-KNIT® fleece
- Flat seams
- High zipper collar
- Tailored for women

SIZE XS-L

COLOR Black

MIDDLE LAYER

NITRO 1320

SOFTSHELL JACKET

This windproof water-repellent jacket will cope with light rain and will not distract you from your favorite activity. Comfortable and suitable for everyday wear and as an insulating layer in the cold season.

- 3-layer SOFTSHELL material
- Soft fleece lining
- Chest pocket with zipper
- Windbreak under the center zipper
- Chest pocket and two side pockets with zippers
- Sleeves and hood with elastic ribbing

60% Coolmax; 30% Nylon; 5% Spandex; 5% Elastane.
SIZE 39 - 42, 43 - 45

UV PROTECTION

When you embark on outdoor adventures during hot, sunny days, UV protection gear becomes an essential companion. It acts as a strong barrier against harmful rays, safeguarding your skin effectively. Additionally, the gear is designed with lightweight and breathable fabrics, allowing for efficient heat dissipation, so you can stay cool and comfortable, preventing any heat-related discomfort or exhaustion. With UV protection gear on your side, you can fully enjoy the thrill of your adventures without unnecessary interruptions from sun-induced issues.

UV PROTECTION

VIZARD 6608 NEW

UV PROTECTION

This UPF 50 long-sleeve shirt with a built-in buff offers full protection for the upper body and neck from harmful rays. Made of quick-drying, breathable fabric, it ensures unmatched comfort during outdoor activities and daily wear.

- UPF 50 sun protection
- Antibacterial coating
- Material with anti-insect technology
- Built-in buff
- Raglan sleeve

SIZEING CHART

HOW TO CHOOSE THE PERFECT SIZE WADER

Measure your waist circumference at the narrowest part and measure your hips at the fullest part, standing with your feet together. Choose the largest measurement and refer to the size chart. If you are looking for ATV waders, add from 0.8 to 1.2 inches to your inseam measurement.

| cm | 62-66 | 72-78 |

HOW TO CHOOSE YOUR WADING BOOTS SIZE

Place a piece of paper on the floor and sit down in a chair with your foot resting on the piece of paper. Trace the outline of your foot. Measure the length of the foot from the heel to the tip of the big toe in inches. Refer to the size chart. If you use neoprene or double layered thermal socks, add 0.20 inches.

| Canada/USA | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
|---------------------|----|-----|-----|-----|-----|-----|-----|-----|-----|
| Europe (EUR) | 39 | 40 | 41 | 42 | 43 | 44 | 45 | 46 | 47 |
| Foot length | | | | | | | | | |
| inches | 9" | 10" | 10" | 11" | 11" | 11" | 12" | 12" | 13" |
| cm | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 31 | 32 |

HOW TO CHOOSE YOUR GLOVES SIZE

Measure the hand you normally write with at its widest point in inches (excluding the thumb). Refer to the size chart.

| MEASUREMENT AROUND PALM | S | M | X | XL |
|-------------------------|-------|-------|-------|-------|
| inches | 7"-8" | 8"-9" | 9" | 10" |
| cm | 19-20 | 21-22 | 23-24 | 25-26 |

TECHNOLOGIES

HARD-TEX® MEMBRANE

Hard-Tex® membrane is a waterproof breathable membrane fabric. This microporous material has over 1.2-1.4 billion tiny holes per square centimeter. These pores are smaller than raindrops and larger than vapor molecules. Due to this structure, Hard-Tex® membrane stops liquid water but allows vapor to pass through. This means Hard-Tex® keeps you dry from the water outside and lets excess moisture evaporate from the skin.

TEFLON® COATING

Teflon® coating is an extremely durable non-stick tissue treatment that forms an invisible protection around the fibers, providing mud resistance. Any liquid, even oil-based, can be brushed off the fabric, as well as dust and dried mud can be removed with a simple cloth brush. Teflon® coating makes cleaning easier and extends the durability of riding gear.

TIZIP® ZIPPER

TIZIP® zipper is absolutely waterproof, strong, and suitable for demanding use. It provides both 100% water protection and fast access. TIZIP® zipper is highly resistant to damage caused by dirt and mud. It is also airtight, which means the seal is designed to tighten as the internal air pressure increases.

3M™ REFLECTIVE ELEMENTS

Durable reflective elements are made by 3M™ Company from a material which reflects a large amount of light directly back toward its source. All garments with 3M™ reflective elements provide enhanced visibility of the rider, improving his safety, especially at nighttime, dawn, and dusk.

POLARTEC® FABRIC

Polartec Thermal Pro fleece is the most advanced performance material of the Polartec® insulation fabrics. Its unique surface structure creates air pockets to trap air and retain body heat, delivering excellent lightweight warmth. Since Thermal Pro is also breathable, fast-drying, and durable, it's perfect for dynamic or static outdoor activities in mild and cold weather.

THINSULATE™ INSULATION

Thinsulate™ is an innovative synthetic material which is created to be more effective than natural down due to the increased density of fibers with a decreased size of fibers. The gaps between fibers not only retain some of the heat produced by the body, but also allow moisture to escape. Thinsulate™ retains its insulating properties when wet and performs great in any environment.

THERMALRATE® INSULATION

An innovative Thermalrate® insulation technology introduces the best warmth-to-weight ratio. Thermalrate® is a go-to choice for a thin and effective insulation layer in high-performance gear. It offers great insulation properties in a smaller package and low water absorption to perform great in wet conditions.

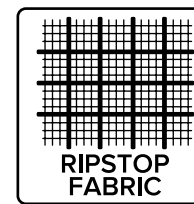

CORDURA® REINFORCEMENT

Cordura® is a heavy-duty material that has been developed to reinforce other fabrics for greater abrasion and tear resistance. When reinforced with Cordura® in key stress areas, riding gear becomes more durable and helps riders avoid cuts or gravel rash in the toughest environments.

HIPORA® MEMBRANE

Hipora® is a 3-layer membrane fabric with a polyurethane coating that prevents water from entering but lets moisture out. It has a microporous structure with tiny holes in it, so water droplets won't get inside the gear, but excess vapor can expel. Your body does not get sweaty while you stay dry and warm.

RIPSTOP FABRIC

Ripstop is a thin, lightweight and waterproof fabric that resists tearing and ripping due to a special reinforcing technique. During the weaving process, thicker threads are interwoven in a crosshatch pattern. With this structure, small tears can not easily spread across the fabric. It makes the finished gear more durable with the excellent strength-to-weight ratio.

DWR

DWR is an ultra-thin Durable Water Repellent finish that is applied to the outer layer of a membrane fabric. It lowers the surface tension of the material and makes water disperse rather than saturate. DWR is usually used with waterproof membrane multi-layer fabrics such as Hard-Tex® to additionally protect outer layers against water penetration.

YKK FASTENING

YKK fastening products set the industry standards for function, quality, and design. The extra strong YKK plastic hardware provides a smooth and easy release in high-performance riding gear. In Fintrail waders, suspenders come with opposing YKK buckles for waist-high conversion and easy put on/off performance.

F.I.L.L.®

F.I.L.L.® technology is used in riding gear to ensure additional flotation assistance in emergency cases. This is a special highly buoyant mid-layer applied in the basic fabric. If a rider breaks through the ice and falls into the water, F.I.L.L.® technology helps them to stay on the surface, keeping the head above the water for a certain period of time. NOTE! This is not a survival vest or other flotation devices.
